RELIABILITY & RUGGEDNESS

Designed mainly for installation in the cabin corner, the **CANVIEW 8 wide** allows you to save space while ensuring broad visibility thanks to the high resolution (1280x480). It allows you to manage information vertically, supporting all cabin functions.

Mainly expected as a replacement for the analogue dashboard, with the addition of accessory functions, **CANVIEW 12 wide** allows the use of multiple displays to be merged into a single viewer, to save space in the cabin and give continuous visibility to various functions.
